

Table 1. One-way ANOVA results for transformed moth counts

Factor	Groups	N	SS effect	df effect	MS effect	SS error	df error	MS error	F	p	Decision
Site	5	53	4086.25	4	1021.56	51003.45	48	1062.57	0.96	0.44	Fail to reject H ₀
Night	14	53	42652.61	13	3280.97	12437.08	39	318.90	10.29	<0.001	Reject H ₀
Size class	4	56	7970.69	3	2656.90	5398.80	52	103.82	25.59	<0.001	Reject H ₀

Note. SS = sum of squares; MS = mean square. Counts were square-root transformed prior to analysis. For each test, H₀ assumes equal group means; the alternative hypothesis is that at least one group mean differs.
